| <p>Historic cemeteries and burial grounds are fragile, tangible heritage resources that connect residents and visitors to their Loudoun roots. As the County continues to approve new construction projects these cemeteries have been impacted. In some cases they have been inadvertently destroyed. In other cases, graves have been moved to other burial locations to make way for new projects. While the County has kept some records of known cemeteries and burial grounds, there has never been a systematic effort to consolidate locational information into a publicly accessible database.</p> <p>In the Spring of 2018, the Board of Supervisors (BOS) directed County staff to create such a database that could provide residents, researchers, and developers with cemetery and burial ground locations as a means of ensuring that these resources are protected and preserved.</p> <p>The historic cemetery data are based on field reports which have been submitted by many and varied individuals, groups, institutions, and cultural resource firms. Submissions to the Site File are sometimes accepted from amateurs as well as professionals. The locations are only as accurate as the locational information submitted to the Site File by the site recorder. The accuracy of submitted information cannot always be verified. The absence of a cultural resource in this data layer does not preclude the existence of an unrecorded resource in the field. The cemeteries recorded at the Site File represent only a fraction of the historic cemeteries present statewide.</p> <p>View the County's interactive cemetery map database here: https://loudoungis.maps.arcgis.com/apps/webappviewer/index.html?id=107f55b2c8e64e4399e1fc95c797531e</p> | | | | | | | | | | | |
